

7TH VIVUS CONFERENCE

"BETWEEN THE VISION AND REALITY OF NEW HORIZONS"

24 November 2022 (live and on-line)

Biotechnical Centre Naklo, Higher Vocational College, Strahinj 99, 4202 Naklo

INVITATION TO PARTICIPATE

We invite you to participate in the 7th Vivus Conference "Between the Vision and Reality of New Horizons", where you will present your scientific and professional contributions in five sessions: agriculture and forestry, nature conservation and environmental protection, horticulture, food and nutrition and rural areas.

At the Biotechnical Centre Naklo, we want to improve cooperation between researchers, the agri-food industry, trade and other related activities from Slovenia and abroad. For twelve years, the VIVUS conference has been a platform for international scientific debate on agriculture, nutrition, rural development, nature conservation and environmental protection.

The VIVUS Conference is an excellent opportunity to exchange ideas, strengthen existing and create new academic networks, as well as to foster dialogue between educational institutions, public institutions, the private sector and civil society organisations on issues related to the latest global and local trends in agri-food.

The programme committee includes researchers from different countries, giving the conference a strong international flavour and scientific relevance. The multidisciplinary outputs and outcomes of VIVUS will contribute to the dissemination of knowledge and good practices to all stakeholders in the agri-food chain, as well as to the wider public, on strategies, understanding challenges, setting objectives and selecting mechanisms for future agricultural and rural development.

Join us.

dr. Marijan Pogačnik, Chairman of the Programme Committee
