

### 3.2.5 Pot sizes for vertical greening systems

The size of the pot/plant is dependant on the living wall system used. 9 cm pots are often used in systems which have a series of small 'cells' forming the modular panel, such as the Humko, Vertology and ANS Global systems. 1 to 2 litre pots are often used in systems which are formed of troughs or pockets or individual containers, such as the Treebox trough system, the Terapia Urbana pocket system, and the Nemec Cascade Living Walls container system.

Pot size guide [5]:

Pot Size	Pot Diameter (Top)	Pot Diameter (Base)	Pot Height
9cm (0.36 Litre)	9.0cm	6.0cm	8.5cm
11cm (0.74 Litre)	11.0cm	7.7cm	10.0cm
1 Litre	13.0cm	10.0cm	11.0cm
2 Litre	17.0cm	12cm	13.0cm
